

WHAT'S NEW IN PCR VERSION 16.1

New Report – MCR registered patients with Annual Stage 1 Medication Review Due/Overdue

Background

The Scottish Government circular PCA (P)(2021) 3 (additional pharmaceutical services Medicines: Care and Review service – directions and service specification) introduced some key changes to the Medicines: Care and Review Service (MCR).

One of the new requirements related to annual pharmaceutical assessments for MCR registered patients (using the PCR Stage 1 Medication Review). The annual assessments are to be conducted within 16 weeks following the anniversary date of the patient's MCR registration.

A new report, introduced in PCR version 16.1, will flag all MCR registered patients who have an annual Stage 1 Medication Review Due or Overdue.
