

Safety Action Notice

Reference: SAN2205(U2)

Issued: 03 August 2022

Review Date: 03 August 2023

Recall of hygiene products associated with *Pseudomonas aeruginosa* infection (Update)

Summary

Safety Action Notices SAN2205 and SAN2205(U1) were issued on 05 July and 06 July 2022 respectively to support Vernacare's April 2022 voluntary recall of hygiene products associated with *Pseudomonas aeruginosa* infection. The Safety Action Notices requested the removal and secure holding of affected products and advised further information would be issued. This update is issued to advise on actions to take on any securely held stock.

Action

1. Bring this notice to the attention of all appropriate managers and staff in healthcare, social care and wider settings.
2. Further to the previous action requesting that affected products be removed from the setting immediately and securely held, the following actions should be taken:
 - a. In areas with no evidence of *Pseudomonas* cases, held products and any additional products identified can either be disposed of or, alternatively, arrangements can be agreed with Vernacare for their return.
 - b. In areas with evidence of *Pseudomonas* cases and/or outbreaks, continue to hold these products and any additional products and contact ARHAI Scotland (IPCTs) (nss.arhaiinfectioncontrol@nhs.scot) or Public Health Scotland (HPTs) (phs.HealthProtectionEnquiries@phs.scot) for further instruction.

Equipment details

Details regarding the product recall, including instructions on contacting Vernacare, are provided on the Vernacare website which can be found via this [link](#). Information including product codes has also been published on GOV.UK by the Office for Product Safety and Standards and can be found via this [link](#). This Safety Action Notice follows National Distribution Centre notifying all NHS Scotland Health Boards of the product recall on 5th May 2022 (**NDC Recall Notice PR341**). Wider settings may have received a recall notice via other distribution networks.

The following product brands are subject to recall:

Product Name	Obsoleted codes	New/Current product codes
Oasis Shampoo Cap - Perfumed	RSC905, RSC965UP	SC01
Oasis Shampoo Cap - Unperfumed	RSC905UP, RSC965UP	SC01UP

Oasis Maceratable Bedbath - Perfumed	MBB05, MBB08, MBB10	BBM05, BBM08, BBM10
Oasis Maceratable Bedbath - Unperfumed	MBB05UP, MBB08UP, MBB10UP	BBM05UP, BBM08UP, BBM10UP
Oasis Washmitt - Perfumed	RSC604A	WM08
Oasis Washmitt - Unperfumed	RSC605A	WM08UP
Oasis Bedbath - Perfumed	RSC901, RSC901SE, RSC912, RSC901G	BB10, BB08
Oasis Bedbath - Unperfumed	RSC902N, RSC910N, RSC913NM, RSC913N	BB10UP, BB05UP, BB08UP
Conti Contenance Care Skin Cleansing Wipes	RSC555	CCC025
Conti Patient Cleansing Wet Wipes	RSC777	CW050P
Conti Flushable Skin Cleansing Wet Wipes	RSC767	NLM
Conti Patient Cleansing Wet Wipes	RSC774N	CW050
Conti Skin Cleansing Wet Wipes (previously Senset skin cleansing wipes)	900PW012, 900PW024, 900PW050	CWF024, CWF050, CWF050L
Conti Contenance Care 3% Dimethicone Barrier Cloth	RSC553	CBC025

Background

P. aeruginosa, a Gram-negative bacterium, is often found in soil and water. It can cause a wide range of infections, particularly in people with a weakened immune system. It is associated with healthcare infections, particularly pneumonia and sepsis, and can be resistant to many commonly used antibiotics.

A large recent outbreak of *P. aeruginosa* ST3875 in Norway (Oct. 2021- Jun. 2022) has been associated with contaminated disposable wipes and comprised nearly 400 patients from 40

hospitals. Cases had a median age of 70 years and were from predominantly intensive care or vulnerable patient groups. 25% of cases had clinically severe infection. *P. aeruginosa* infection was considered by treating clinicians to be a contributing factor in the death of several cases.

These products have been available in health and care settings in Scotland. Links between the products and a number of cases and outbreaks in Scotland are currently being investigated. There is a need to raise awareness among health and care professionals who might encounter potentially associated cases. It is crucial to ensure relevant products are removed, including from health and care settings.

Suggested onward distribution

These products have been supplied directly or via suppliers to a wide range of settings including healthcare (e.g. hospitals), care facilities (e.g. care homes), local authorities, pharmacies, and commercial premises. Products are also sold online.

Any onwards distribution should take account of this and all settings using this product should be sent this Safety Action Notice.
