

National Stoma Quality Improvement (NSQIG)

Data Sub group

NHS Scotland Stoma Prescribing Data Survey

(Version 2.0)

Introduction

The National Stoma Quality Improvement Short Life Working Group (NSQIG) has been commissioned by NHS Scotland Executive Nurse Director Group (SEND) to identify and develop a national approach that ensures patients across NHS Scotland have equitable access to evidenced based stoma care with cost effective product prescribing practice.

A data sub group has been developed to review current product prescribing data across Health Boards and identify and develop opportunities for optimal data reporting to drive quality and efficiency.

The aim of this questionnaire is to scope current stoma data reporting across NHS Health boards.

We would appreciate if you could complete the questionnaire and return to:

alice.macleod1@nhs.net

Thank you for your co operation

NSQIG Stoma Data Questionnaire

NHS Health board	
Job Title of Collator
