Proj	ject Title	National Stoma Qu	uality In	nprovement Short L	ife Working Group (NSQIG)		
SUB	GROUP	DATA					
SUB GROUP Alice Macleod LEAD							
Rep	orting To	NSQIG Steering Group					
Aim	l	Develop tasks required to produce optimum data reporting methods submit recommendations /action plan to project steering group.					
Proj					cross Health Boards and I data reporting to drive		
Star	t Date	July 2018					
	npletion eline	DECEMBER 2018					
QUC	ORATE	50% OF MEMBERS					
Sub	-Group Men	nbers					
Nan	-		Role	Role			
Gavi	n McColl		Principle Analyst ISD NHS National Services				
Sara	h Fry		Senior Information Analyst ISD NHS National Services				
Barry Melia			Principle Pharmacist ISD NHS National Services				
David Thomson			Community Pharmacist NHS GG&C				
Tracy McMeekin			Stoma Care CNS NHS Ayrshire & Arran				
Anne Haston			Stoma Care ANP NHS Lothian				
	Karen Whatton		Lead Prescribing Advisor NHS Fife				
-	Billy Hislop			Procurement Category Manager NHS National Service			
RAG	Comp			In Progress	Not started		
No		Tasks		Plan Start Date	Comments		
1		e format of baseline st data & metrics develop		May 2018	In progress		
2	Develop pro	ocess to review current	data	Aug 2018	In progress		
3	Develop a minimum data set with agreed metrics that support stoma product trend / variance / patient level data to support consistent stoma data analysis across NHS Scotland.			Sep 2018	In progress		
5	Submit recommendations and action plan to steering group chair by December 2018			Dec 2018	Not Started		

Drograce	Notes v 5 Update for steering group progress report 12.11.18				
Agenda Item	Progress	Lead			
1	Introductions & apologies noted. Quorate present Attending: A MacLeod, G MacColl, A Haston, D Thomson (S Fry & K Whatton via TC) Apologies : T McMeekin, B Hislop				
2	 S Fry & Gavin presented data update: General consensus that the analysis & metrics were useful with particular reference to: Use & Expenditure data modelled against published appliance use guidance: Slide 3 (Prescqipp, PIP & ASCN) 5 year trends showing ileostomy use as highest increase in cost & quantity. Agreements from sub group that CPTP for stoma use is one of the national indicators that could be used going forward. Gavin, Sarah & Barry to continue analysis: Gavin will pull information to report key areas of stoma activity & prescribing , community , hospital & care homes Presentation attached for review & comments by 02 11.18 	ALL			
3	Analysis Update.pptx A Macleod presented draft analysis ppt of stoma prescribing data survey. Survey looked at process and data capture from prescribing teams who are involved in identifying community stoma product usage. Group though this useful to indentify gaps. Main points: Lack of clarity around metrics used for review, lack of information of patient numbers. Presentation attached for review & comment by 02.11.18	ALL			
4	Need to identify any gaps in current data capture to develop recommendations: standard approach to data capture/ identify proof of concept testing Need to scope other areas of data capture: stoma nurses and DACS. Craig, Billy & Alice had met with BHTA. DAC representative from Fittleworth present at the meeting. They produce reports for Health Boards around product use. Fittleworth offered a visit to Glasgow / Edinburgh office to review their process of data capture. Approved by Craig.				

	Glasgow visit planned Nov 8 th 12 – 3pm.	
	 Action: 1. Alice, David Thomson & Gavin expressed interest in attending Nov 8th. Fittleworth can also arrange visit to Edinburgh office. Notes of interest to Alice. 2. Draft survey to scope what data stoma nurses capture & circulate to sub group for comments. 3. Draft indicators to NHSS Stoma CNS for comment (Recommendation that this work is ongoing) Below draft developed into live survey link sent to CNS 12.11.18 	AH, KW DT AM
5	Next meeting date 26.11.18 Plan sub group report for December
