Quality Technical Agreement

Section A

Background

This is a quality technical agreement (the “Technical Agreement”) between the Contract Acceptors/ Service Providers and Contract Giver /Customer which describes the roles and responsibilities of the involved Parties in relation to the supply of services to **SNBTS Possil Park Garage, Glasgow** as listed in Section C to this Technical Agreement. The aim of this Technical Agreement is to define the general conditions to be applied by the Contract Acceptor for the services supplied. This Technical Agreement further defines the key principles of co-operation between the Parties with respect to quality issues related to the services supplied.

This agreement involves two Parties as listed above and applies to the activities carried out by NSS Facilities for SNBTS, both being Directorates of the Common Services Agency.

In the event there is a conflict between the Technical Agreement and the Memorandum of Understanding (MoU) between NSS Facilities and SNBTS, the MoU will take precedence in all non-quality related matters unless otherwise stated in the MoU while the Technical Agreement will take precedence in all quality related matters. This Technical Agreement shall be effective at the time of the last approval signature of all parties and will remain in effect until either it or the MoU is terminated subject to the terms of the MoU.

Where the Contract Acceptor is authorized in writing by the Contract Giver to use Permitted Subcontractors these are listed in Section D. Any reference to responsibilities of the Contract Acceptor herein is to read as applying to the Permitted Subcontractor for any activities the Permitted Subcontractor performs on behalf of the Contract Acceptor. Accordingly, the Contract Acceptor is responsible for putting in place appropriate management systems and contractual agreements with said Permitted Subcontractors to ensure the responsibilities are met to the satisfaction of the Contract Giver.

Changes to this Technical Agreement:

Any changes to the information contained in the Technical Agreement must be approved in writing by the Parties in advance. Thereafter such changes can be implemented by approving a new revision of this agreement.

Ending the Technical Agreement:

This Technical Agreement shall remain effective until terminated as set out above. However, the termination of the Technical Agreement shall not relieve either Party of its obligations regarding safe storage of data, documents and materials associated with activities described herein.

Quality Technical Agreement
