As discussed today, we perhaps took a little longer exploring the tests than could have given the same answer but you have asked us to be as rigorous as we can even if that means it is not always the answer that is expected/hoped for.

As I said today we now need to move to RIE modelling and, missing information aside, some further position there (against I appreciate a shortening horizon). We will need to go back to QEUH to close the loop for a final report. I know that the core business will probably be sorted by then but we need to do it and you need to have it on file.

[REDACTED] thanks for the document which is very helpful in informing our discussions with GG&C.

Regards

Hi,

Draft/outline comments in a report format. Questions/clarifications let me know

Thanks
