Hi,

Updated to include RIE, there are points of detail to be addressed (red text). I have not included a doc reference, there is a lot of information that once sifted does not have direct relevance, [REDACTED] and I need to do a final check on this to close.

[REDACTED] and [REDACTED] have identified scenarios that can inform, to the extent that they can, the question of times/temperatures, for an overall evaluation of 'risk'.
