

Appendix 3- Supply failures, stock-outs and supplier withdrawals FY 2526

Supply failures, stock-outs and supplier withdrawals against National Procurement framework lots -- FY 2025/26

Reporting period: 1 April 2025 to 31 March 2026

Measurement: Framework-lot instances recorded as a supply failure, stock-out or supplier withdrawal
Counting basis: One instance per source row / framework lot; records marked void or reversed are excluded
Raw-material attribution: Counted "Yes" only where the supplier explicitly cited active ingredient, raw material, API or bulk supplier
Coverage: 83 records: 34 from the current Terminations Log and 49 from Archived Central Terminations List.xlsx

Summary by recorded therapeutic category		
Therapeutic category	Supply failure / stock-out / withdrawal instances	Attributed to active ingredient or raw material shortage
Antibiotics	4	0
Cardiology	11	2
Gastroenterology	1	0
Immunology	2	0
Neurology	1	0
Oncology	6	0
Ophthalmology	2	0
Psychiatry	6	0
Respirology	1	0
Not provided in archived list	49	1
Grand Total	83	3

Interpretation and limitations
The archived source does not contain therapeutic-category or structured reason-category fields. Its 49 records are therefore shown as "Not provided in archived list"; no clinical category has been inferred.
Seven archived records contain no supplier reason. These are stated as "No information provided in archived list" and are not treated as raw-material shortages.
Category labels and supplier wording are reproduced from the source records. The detailed schedule identifies the source workbook and original row for audit purposes.

Reading the figures
The grand total is the complete count of qualifying framework-lot rows. The raw-material figure is a subset based solely on explicit supplier attribution; "no" does not mean the underlying cause was disproved, only that it was not explicitly attributed in the recorded wording.
The 49 archived instances cannot be broken down by therapeutic category from the information held in that source and are separately identified in the summary.
Detailed evidence schedule begins at row 23. Use the filters to review dates, framework references, reason wording, attribution and provenance.

Date received	Termination ID / availability	Framework reference	Generic number	Product description	Therapeutic category	Reason category	Supplier reason details	Explicit raw material / API attribution	Source / row
01/09/2025	T-2509-359-MAR	NP35925	NP359118	Icatibant 30mg/3ml solution for injection pre-filled syringes	Immunology			No	Terminations Log row 2
