Dear [REDACTED]

Freedom of Information Reference FOI-2026-3469

I refer to your Freedom of Information (Scotland) Act 2002 (FOISA) request that we received on 1 September 2026 requesting the following information:

1. I am writing to request historical NHS dental prescribing information relating to my practice in Scotland during 2018. The information is required for ongoing regulatory proceedings.

I would be grateful if you could provide, where held:

- The total number of prescriptions attributed to my prescriber or list number during 2018.
 - A breakdown by drug or preparation, including Duraphat/Sodium Fluoride 5000 ppm toothpaste, Sodium Fluoride mouthwash, Amoxicillin, Erythromycin, and Fluconazole.
 - The relevant patient-number, registration or other denominator data used by Practitioner Services when assessing prescribing activity.
 - Any prescribing rates or prescribing-analysis metrics held in relation to my prescribing during that period.
2. I would also be grateful for any comparative or benchmark data available for NHS dental practitioners during the same period, including, where held:
 - Average or median prescribing rates for NHS dentists in Scotland in 2018.
 - Comparative prescribing data for the preparations listed above.
 - Prescribing rates per patient, per 100 patients, per registered patient population, or any other denominator ordinarily used by Practitioner Services.
 - Any percentile, peer-comparison, prescribing-monitoring, or outlier analysis relating to my prescribing.

Chair Mr Keith Redpath
Chief Executive Professor Karen Reid

- Any NHS Board, regional or national comparator data that would enable my prescribing activity to be considered in context.

If any prescribing-monitoring methodology, thresholds or criteria were used by Practitioner Services in 2018 to identify unusual or atypical dental prescribing, I would also be grateful for a copy or description of that methodology.

After a search of our records Public Services Delivery Scotland (PSD Scotland) can confirm the following:
