FOI response summary: Haemophilia and von Willebrand medicines

Homecare delivery dataset; Calendar years 2021–2025; Extract through 24 October 2025

Annual homecare totals (2025 is partial)				
Year	Quantity delivered	Expenditure	Unique patient IDs	Coverage
2021	43928	£11,670,287.89	253	Full year
2022	35203	£13,922,629.26	260	Full year
2023	34137	£15,654,801.25	262	Full year
2024	37310	£18,899,292.54	270	Full year
2025	24358	£13,808,582.39	269	To 24 Oct 2025

Disclosure interpretation
Quantities are homecare deliveries in recorded vials/product units, not pharmacy issues or confirmed consumption. Monthly zeroes and unavailable months are explicitly labelled in FOI Monthly.

Dataset availability				
Dataset	Availability	Treatment		
Homecare deliveries	Available	Reported by month and product		
Pharmacy issues	Not present in workb	Not combined or estimated		

FOI monthly product disclosure — homecare deliveries

Calendar months 2021–2025; pharmacy issue data is not present in this workbook and is not combined with homecare.

Month	Calendar year	Brand	Product presentation	Active ingredient	Therapy class	Strength / presentation	Recorded quantity measure	Quantity delivered	Unique patients	Source lines	Data status	Dataset	Date basis	Disclosure note

Method, coverage and product dictionary

Topic	Disclosure statement
Response scope	Homecare delivery records in Raw Data only. Pharmacy issue data/framework extracts are not present and have not been inferred or combined.
Date basis	Shipment Date, aggregated to calendar month.
Time coverage	1 Jan 2021 to 24 Oct 2025 within the requested period; November and December 2025 are marked missing/unavailable.
Quantity interpretation	Sum of the recorded Quantity field: vials/product units delivered. It is not confirmed administration or consumption.
Expenditure	Broad annual homecare spend is reported on FOI Summary only. Product- and presentation-level expenditure is omitted because combining it with quantities could enable pricing to be inferred.
Unique patients	Deduplicated Patient ID count within each month and product presentation (and within year/brand in the annual summary). Patient identifiers are not disclosed.
Zero vs missing	Zero means the source dataset covers the month but contains no matching delivery line. Missing means the month is beyond the supplied extract cutoff. No suppression marker was found.
Geography/service cover	Homecare records attributed to the six Scottish haemophilia centres/hospitals listed below; this does not establish complete national pharmacy-issue coverage.
Frameworks	Delivery-fee sheets refer to LPCH and Sciensus/HealthNet scenarios, but the Raw Data does not carry a framework field by transaction; no framework split is asserted.
Gene therapy	No eligible gene-therapy product line was identified in the supplied Raw Data for 2021–2025.
Exclusions	Service/sundry charges, delivery fees, administration kits, sharps bins, needles, syringes, dressings, wipes, heparin/flushes and Factor XIII products were excluded.
Product naming	Brand, active ingredient and class are mapped from product descriptions; strengths are parsed from the recorded presentation text.

Recorded referrer / centr	Eligible source lines
